4. To consider correspondence and any other urgent matter:

To further discuss request from Western Power to relocate their substation now sited at Glanffynnon to the entrance of Llangunnor Park, and their response to our objection withholding consent, which has been circulated, but is again appended below for ease of reference.

Thank you for your email.

We are very sorry to hear that the community council did not approve our proposition for the substation, however, we do hope that we can work with you to address some of your concerns.

Firstly, I think it is worth clarifying that the purpose of the substation is to benefit the community. Western Power Distribution have a statutory duty under Section 9 of the Electricity Act 1989 to develop and maintain an efficient co-ordinated and economic network. It is for this reason that we continually review our substations and upgrade the apparatus and their locations when necessary. This is

Croesewir gohebaith yn Gymraeg neu'r Saesneg / Correspondence in Welsh or English is welcomed.

particularly important right now as we must accommodate the growing demand for electricity as communities move towards achieving net zero. Whilst the UK Government have strategized to achieve net zero by 2050, Carmarthenshire County Council aim to be a net zero carbon local authority by 2030. It is due to this that we are receiving more and more requests for increased electrical supply as we see more demand for electric car charging points and so on. In addition to this, upgrading the equipment future-proofs against faults in the community and ensuring we have suitable access routes for our workmen to safely and efficiently access the substations during a fault minimises customer minutes off supply. These are the reasons why it is necessary that Glanfynnon substation is updated and relocated to benefit the community.

Unfortunately, when considering a suitable location to move a substation to we are limited by numerous factors. The standard plinth is 3.3m x 2.4m whilst the kiosk itself is 3.1m x 2.3m x 2.3m. We always try to ensure that the substation is a minimum of 10m from living spaces. We require a suitable access to the substation for vehicles with at least a 3m wide driveway (if not already on a road or carpark) for the rare occasion on which our vehicles or lorry may need to access the site to install/replace the substation. In addition to physical constraints, we must also bear in mind that the further away we move the substation the higher the risk of a voltage drop. Our Technician is aware of the location of the manholes and they are satisfied at this stage that they will not affect the substation. If you agreed to the proposed location we would then conduct test holes to double check that this is still satisfactory. I hope this explanation provides more clarification as to why we believe that the entrance to the park is the best location for the substation. Additionally, I am unsure whether the Community Council are aware that there are already high voltage underground cables running through the park and this is another reason why we would like to put the substation here as it would be right next to the existing cables.

I appreciate your comments regarding how the substation and the enclosure would look at the front of the park. However, we do not propose to replicate the existing substation at Glanfynnon, which I do agree would be an eye sore to your park. I attach a photograph of the green kiosk we would propose we place in the corner and there would not be any fencing around this as it is a secure unit itself. We do also have a grey version of this kiosk (photo of the rear of this attached) which we could supply instead if you preferred, however, we thought the green kiosk would blend in better with the park.

I'm afraid I cannot comment as to why you have not received any contact from your landlord Carmarthenshire County Council regarding this, however, it is of course our duty to seek consent from any landowner and tenant which is the reason for us contacting you directly.

We would be very grateful if you would kindly inform the community counsellors of the above points and we hope that we may be able to work together to find a solution that is agreeable to all. We are more than happy to meet with yourself and any other counsellors on site to discuss our proposals if you would prefer. Please let us know when suits you best.

CYNGOR CYMUNED LLANGYNNWR

LLANGUNNOR COMMUNITY COUNCIL

Clerc – Howard Davies - Clerk
